FEDERAL COMMUNICATIONS COMMISSION  
WASHINGTON, D.C. 20554

22 JAN 1993

IN REPLY REFER TO:  
7330-7/1700A3

DOCKET FILE COPY ORIGINAL

Honorable William S. Cohen  
United States Senate  
Washington, D.C. 20510

Dear Senator Cohen:

This is in reply to your letter of January 8, 1993, in which you <sup>2</sup>inquired on behalf of your constituent, Linda J. Griffin, regarding the Notice of Proposed Rule Making (Notice) in PR Docket No. 92-235, 57 FR 54034 (1992). This Notice proposes comprehensive changes to the Commission's Rules governing the private land mobile radio services operating in the frequency bands below 512 MHz.

Those rules have been in place for over 20 years. While they have been amended on numerous occasions since that time, they nonetheless embody regulatory concepts based on yesteryear's technology and, unless changed, will stifle the growth and development of private land mobile radio technology and services, which are used primarily by local governments, public safety entities, and businesses to enhance their productivity. The Commission issued the Notice, therefore, to solicit comment from all interested persons on a wide variety of proposals designed to increase channel capacity, to promote more efficient use of these channels, and to simplify the rules governing use of these channels.

The proposals in the Notice reflect to a large extent concepts and proposals submitted in the initial inquiry stages of this proceeding. None of the proposals set forth in the Notice, however, are engraved in stone. Indeed, the proposals represent our best judgment at this stage of the proceeding on steps that must be taken to improve the regulatory climate for users of the private land mobile radio spectrum below 512 MHz. To this end, some of the critical issues that must be resolved relate to channel spacing, the amount of time provided to users to convert to new technical standards, how the 300 to 500 percent increase in channel capacity should be licensed, how the rules should be written to provide users technical flexibility, and whether the current nineteen radio services should be consolidated and, if so, how. I have enclosed for your information a copy of that part of the Notice that describes the numerous proposals.

We are, of course, sensitive to the concerns of users of private land mobile radio spectrum and the impact that these proposals may have on their radio systems, including the costs of required modifications.

Honorable William S. Cohen

2.

We will, however, take into careful consideration all their comments. Your constituent's concerns will be fully evaluated when we develop final rules in this proceeding. As indicated in the Notice, we remain convinced that without significant regulatory change in radio operations in the bands below 512 MHz, the quality of communications in the private land mobile radio services will continue to deteriorate to the point of endangering public safety and the national economy.

We want to thank you for your interest in this proceeding. Comments on the proposals set forth in the Notice are due February 26, 1993, and Reply Comments are due April 14, 1993. We expect final rules to be issued near the end of 1993. We urge your constituent to file formal comments on all aspects of the proposals.

Sincerely,  
*Beverly H. Baker*

*for* Ralph A. Haller  
Chief, Private Radio Bureau

December 28, 1992

Dear Senator Cohen:

Implementation of a radical document just released by the F.C.C., P R Docket 92-235 will seriously impair the forest industry in Maine, the safety of its workers and the general public. This proposal would ruin the radio systems everyone depends on by reducing range, lessening reliability, increase interference, while costing a lot of money to alter equipment that the F.C.C. may end up phasing out.

You know how large and slimly populated a place northern Maine is. Job site and mills are widely separated. Private radio systems that took a lot of private money to install are now used to coordinate work and more important to communicate during emergencies like fire, lost people, and accidents in the woods and on the roads. Almost always first word to police and ambulances of a highway accident or moose-car collision comes over a private radio. Our area is not even served by cellular phone and that commercial system is too expensive for constant use.

In short, demand for radio frequencies is not a universal problem. Rules intended for heavily populated areas will not work in Maine. The forest industry needs to retain its own coordinator and protection of its present frequencies.

Yours truly,

Y

Sincerely,

  
Linda J. Griffin
